670.5
v.17

IN TWO SECTIONS—SECTION TWO

Index to Volume Seventeen of The Paper Industry

April, 1935—March, 1936

Page numbers in this index are preceded by numbers of the issues. April, 1935, is No. 1 and March, 1936, is No. 12

A

Abrams, Allen, and George J. Brabender, Factors affecting the determination of water vapor permeability 12, 972
Absolute and relative viscosities..... 8, 599
Accident experience exchange..... 8, 577
Accident rates in the paper and pulp industry during 1934..... 3, 187
Acid, basic and direct dyes..... 8, 603
Acidproof digester cement..... 7, 517
Adams, F. W., The rate of drying writing paper. 12, 969
Adsorption and swelling of cellulose..... 1, 55
Aerating and atomizing water..... 4, 273
Aerator save-all..... 11, 877
Aligning paper mill pulleys of different width.. 7, 507
Alkali cellulose..... 3, 201
Alkali recovery by electrical precipitation..... 12, 964
Allen, R. C., How power factor improvement reduces power cost..... 12, 956
Analyzation of accidents in paper and pulp mills 8, 577
Animal and fish glues..... 6, 410
Animal size for fine papers..... 10, 729
Application of Diesel engines to the paper industry 12, 973
Application of mechanical coal handling methods 5, 347
Application of individual motors to the wet end sections of paper machines, the..... 3, 178
Ash handling..... 6, 427
Association Meetings:
Fox River valley safety conference..... 3, 172
Groups hold interesting sessions and elect officers 12, 977
Parent association holds annual meeting.. 12, 960
Salesmen's annual meeting shows progress for year..... 12, 979
Special meeting of the A. P. & P. A..... 9, 661
Summer meeting of Canadian Technical Section 5, 330
Superintendents meet in annual convention 3, 174
T.A.P.P.I. fall meeting at Atlantic City.. 7, 491
Twenty-first annual meeting of T.A.P.P.I.. 12, 963
Twenty-third meeting of Canadian Technical Section 11, 859
Twenty-fourth annual safety congress held in Louisville..... 8, 576
Atomizer for dampening paper webs..... 2, 119

B

B & W-Tomlinson process for the recovery of chemicals and heat from kraft black liquor, results of..... 3, 177
Bachman, C. O., Multi-stage freeness control in newsprint production..... 9, 649
Bacon, R. H., Power plant painting and illumination 9, 658
Remedies for knocking steam engines..... 2, 105
Baffles become more important..... 7, 513
Bailey, A. J., The mechano-chemical dissection of wood fibers..... 10, 735
Baker, C. M., Tolerances in white water losses.. 7, 499
Baker, R. R., The application of individual motors to the wet end sections of paper machines 3, 178
Barber, F. G. (See F. C. Peterson)
Barry, E. H., Power plant costs as related to production costs..... 8, 563
Base paper requirements of carbon paper..... 11, 803
Bates, R. M. (See A. W. Nickerson)
Batteries, storage, sulphation of..... 7, 513
Beater 11, 875
Beaver, C. E. (See N. W. Sultzer)
Belt static prevention..... 6, 407
Belts and belt dressing..... 9, 673
Berges, E. H., The importance of the calender stack in paper manufacture..... 3, 180
Bidwell, G. Lamont, Jr., and D. Manson Sutherland, Jr., Proposed methods of computing impact and contact inches in beaters and refiners 12, 968
Black liquor evaporator operation..... 3, 177
Bleaching, consensus of opinion on..... 11, 883
Bleaching soda fiber..... 11, 834
Bleaching of old paper pulp..... 11, 837
Bleaching of Western hemlock sulphite..... 11, 829
Bleaching symposium..... 11, 805
Blue stain development in peeled shortleaf and loblolly pine pulpwood..... 6, 402
Bogalusa Paper Company wood room..... 11, 857
Boiler overhauling and laying up..... 9, 673
Brabender, George J. (See Allen Abrams)
Brainerd, F. W., Testing wood pulp for moisture. 12, 972
Brauns, F. E., A contribution to the mechanism of bleaching..... 12, 963
Bray, M. W. (See G. M. Kuettel)
Browning, B. L., and R. W. Ulm, The nature and measurement of paper acidity..... 12, 971
Buffered bleaching..... 11, 820
Building board..... 11, 881
Bullock, H. L., The colloid mill in the paper industry 12, 967
Burdick, T. A., Application of Diesel engines to the paper industry..... 12, 974
Butzler, E. W., Proper feed-water and boiler-water conditioning for high pressure boilers.. 12, 974

C

Calcium hypochlorite for bleaching of pulp..... 11, 810
Calender stack in paper manufacture, the importance of..... 3, 180
Campbell, W. Boyd, Trend of paper testing..... 11, 862
Can electrical equipment failures be anticipated? 10, 721
Carbon monoxide in boiler uptake..... 11, 875
Carbon paper, base paper requirements of..... 11, 803
Carbon tetrachloride for cleaning wires and felts 5, 318
Carruth, H. P., Opportunity..... 7, 498
Carson, F. T., Some notes on the revision of methods for measuring the strength of paper. 12, 971
Casciani, Ferri, and Axel Heilborn, Calcium hypochlorite for bleaching of pulp..... 11, 810
Casein glues..... 9, 656
Cast ferrous alloys in the paper industry..... 12, 964
Cellulose bleaching under irradiation..... 7, 519
determinations by means of chlorine dioxide. 11, 881
fiber from the standpoint of paper and pulp manufacture 7, 492
fiber, the morphology of..... 7, 492
formation and structure of..... 11, 860
sols of definite viscosity..... 1, 55
Cement, acidproof digester..... 7, 517
Centrifugal pulp screen in board mill..... 4, 253
Changing governor speed on a Corliss engine... 1, 49
Chant, D. B., Accident prevention in the paper pulp industry in Ontario..... 8, 578
Chaplin, M. P., Report on Stuff-Preparation Committee and Mechanical Pulping Committee study of refiners..... 12, 968
Characteristics of power requirements for paper machines, the..... 12, 974
Chemical nature of dyestuffs in pine pulpwood.. 12, 964
Chemistry of lignin, the..... 12, 974
Chip packer..... 5, 353
Chlorinated rubber paints in preventing corrosion 12, 999
Chlorine handling and bleach make-up equipment 11, 822
Chlorine, its properties for pulp bleaching..... 11, 806
Clark, James d'A., Further notes on the Kollergang beating methods for pulp evaluation... 12, 972
Sheet machine design considerations..... 5, 333
Some observations on burst, tensile and stretch tests..... 12, 970
Cleaning condenser tubes..... 5, 347
Coal that makes the cheapest steam..... 6, 397
Codwise, P. W., Water resistance of paper..... 12, 972
Coghill, James, Pulp testing by a rapid sheet making process..... 12, 972
Collinge, H. K. (See G. H. Tomlinson)
Colloid mill in the paper industry, the..... 12, 967
Colloidal aspects of cellulose..... 7, 493
Color analysis and specification..... 7, 500
Combating ice troubles in paper mill water power developments..... 1, 27
Combining problems..... 12, 972
Commutator insulation failures..... 8, 597
Comparative head losses in various kinds of pipe when stock of certain kinds and consistencies are being pumped..... 12, 970
Comparative beating of pulp..... 3, 188
Comparative pulpwood growing capacities of Southwest Georgia and the fog belt of the North Pacific Coast..... 12, 963
Compton, Karl T., Academic or pure research.. 7, 499
Condensate regulating valve for drying cylinders. 12, 993
Condenser condition affects economy..... 4, 269
Consistency regulator..... 3, 203
Consumption of pulpwood and production of wood pulp..... 4, 261
Contribution to the mechanism of bleaching, a.. 12, 963
Control of feed temperature to economizer.... 2, 117
Control of moisture content in paper undergoing the process of progressive drying..... 12, 969
Control of sulphur consumption in the manufacture of sulphite pulp..... 11, 860
Conveyor chains, care of..... 3, 197
Conway, J. M., Psychology of safety from management's viewpoint..... 8, 580
Cook, O. L., Lime for pulp bleaching..... 11, 815
Copper and the copper alloy metals..... 12, 964
Copper numbers in pulps..... 5, 353
Cordes, O. C., The suction felt roll—what it is and how it performs..... 3, 178
Corrugated board, testing..... 3, 203
Cosler, A. S., Production of mechanically defibered pulps..... 12, 966
Coster, N. W., The bleaching of Western hemlock sulphite..... 11, 829
Cowles, Edwin, The Cowles system of detrashing and defibering waste paper stock..... 12, 966
Crawford, J. J., Use of white pigments in paper. 11, 860
Curran, C. E., Twenty-five years of research.... 4, 243
(See also G. M. Kuettel)
Current Thought:
A letter from Lord Macaulay..... 8, 546
Are you advertising?..... 3, 148
Constant change..... 4, 232
Dust, dust, dust!..... 1, 12
Look out for inflation..... 2, 80
Quoting Mr. Ford..... 5, 302
Random thoughts for September..... 6, 382
"Somebody's got to pay the freight"..... 10, 706
Tammany tactics..... 9, 628
The coming mud storm..... 12, 920
This 'n that..... 11, 790
Under the rule of science..... 7, 462
Current trends in sulphite digester operation... 11, 859
Cylinder machine strikes back, the..... 3, 178

D

Dangers of electric current..... 4, 271
Davies, C. B., Control of sulphur consumption in the manufacture of sulphite pulp..... 11, 860
Davies, Wayne, Belt static prevention..... 6, 407
Davis, D. S., Nomographs for rigidity, stiffness and softness of paper..... 6, 409
Pulp viscosity nomographs..... 2, 101
Split set nomograph..... 12, 953
Steam leak nomograph..... 8, 571
and E. C. Lary, Effect of pH upon the freeness of chemical and groundwood pulps. 4, 249
Degree of polymerization in characterizing pulps. 10, 759
Demand for paper stronger since early spring (D&B Survey)..... 9, 663
Device for producing coated paper..... 5, 349
Dextrin and starch adhesives..... 7, 482

Dickhaut, S. J., Using a pebble mill.....12, 967
Diefenbach, Wm. T., Receptivity of paper for ink 3, 181
Dispersion of a coating mix.....12, 967
Distribution of digester heat following the blow.12, 965
Dodge, G. W., The Thorsen-Hery beater.....12, 965
Doty, E. I., Can electrical equipment failures be anticipated?.....10, 721
